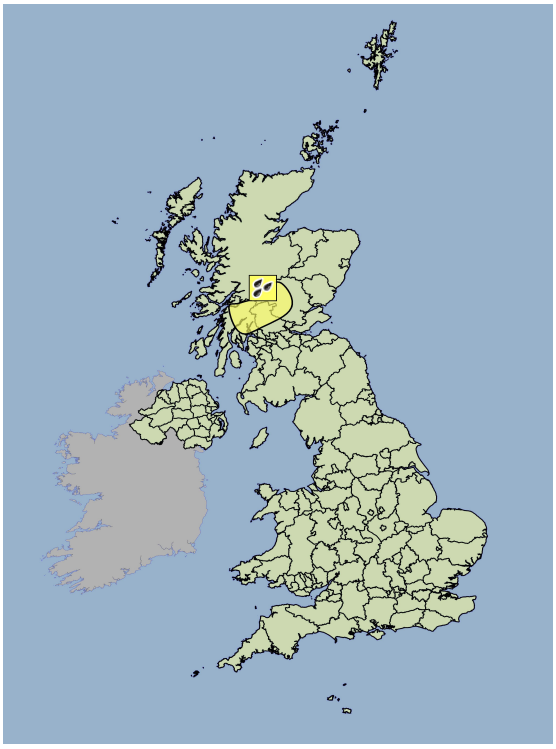
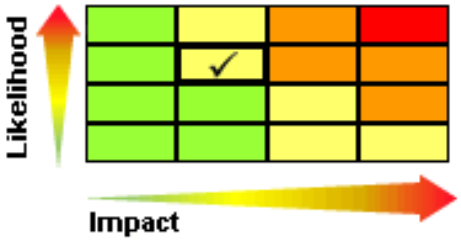
National Severe Weather Warning Service





Chief Forecasters Assessment
Heavy and persistent rain and strong to gale force winds across the region will ease this afternoon, but a further deep depression is set to arrive on Wednesday. This will bring another spell of wet and windy weather, increasing the risk of localised flooding.

20-40 mm may fall quite widely and locally in excess of 50 mm over high ground, probably with some additional water coming from snow-melt over the mountains.

The Met Office have issued a **Yellow Warning** of **Rain**

Valid from **03:00 on Tue, 16th Apr 2013** until **18:00 on Wed, 17th Apr 2013**

Spells of heavy rain will ease away northwards during Tuesday afternoon; however a further belt of heavy rain will spread across the area during Wednesday morning and afternoon.

The public should be aware of possible localised flooding in prone areas.
